SUPPLEMENT TO  
REPORT NO.

1. The radio and DF station west of Krasnoye Selo (30°06'E/59°04'N), Leningrad Oblast, was officially designated KS4. It consisted of two sections (see Annex). DFD, air force, and naval officers entered the station daily.\*
2. The northern section A comprised two large three-story buildings and many (at least 60) radio towers, each about 50 meters high. Sixty more radio towers were to be built in the area of section A by 1960, the target date for the completion of the entire installation.
3. The following buildings were in the area of section B: Administration building, machine house, garages, pumping station with water tower, boilerhouse, technical station, and a large wooden building.
4. A large military airfield was along the Krasnoye Selo-Leningrad road, not far from kilometer stations 7, 8, and 9. There was intensive day and night flying. Jet fighters, allegedly "remote-controlled" by the radio and DF station, were observed over Krasnoye Selo.

25X1A

- \* Report confirms that the radio station west of Krasnoye Selo has been put into operation. Its designation KS4 is reported for the first time.

25X1A

The connection between the observed flying and the radio station seems to be [REDACTED]. It is probable that the radio station was used as a fighter control and aircraft reporting center.

25X1A

1 Annex: Radio and DF Station near Krasnoye Selo.
